
We object to the above proposal, simply because of the abuse already encountered of any spare piece of land that visitors to the town use to avoid paying for parking during the Summer months.

We, as residents, already suffer from the ignorance & disrespect of many visitors who come to our shores in Inveraray & the situation will only be exacerbated if all year charges are introduced
As it is, we do get a slight reprieve during the winter months.

Our Council charges are paid regularly & we do consider that our right to park on land already marked 'Residential' (often ignored) should be accessible without hindrance or confrontation
We fully appreciate that Council Funds will benefit from such a proposal but all too often the wellbeing & consideration of residents is ignored

The proposed parking charges are an extension of seasonal parking charging to all year round. This decision was not based upon revenue raising but to bring Inveraray pay & display car parks into alignment with the Council's other P&D car parks (i.e. no seasonal parking charges). The extension of the Order to cover the free car parks is to allow appropriate enforcement to be carried out which could be responsive to the inappropriate behaviour you have outlined

The Council is currently undertaking a review of the parking regime in the Council area, however; at this time there is no presumption
