If your pet gets distressed by fireworks or other noises, contact your local vet to discuss treatment options. This may include drugs to help dogs with noise phobias or pheromone products to apply next to your pets' den and around the house to keep them calm.

Create a well-padded den for your pet to access ahead of fireworks season so they have a safe place to hide when fireworks start.

Ensure your pet is microchipped and your details are up to date on the database, in case it runs away from home.

Move small pets such as rabbits and guinea pigs to a quiet place indoors.
